Health Advisory – Preventive Measures Against Seasonal Flu

Dear Parents,

In view of the increasing spread of swine flu (H1N1) and other seasonal flu infections, we request your cooperation in taking a few simple but important precautions to safeguard the health and well-being of all our children.

Parents are requested not to send their child to school if the child is experiencing cold, cough, sore throat, mild fever, body ache, unusual fatigue, or any other flu-like symptoms. Even mild symptoms should be taken seriously, as children can easily transmit infections to their classmates and teachers.

Please allow your child adequate rest and seek medical advice, wherever required. The child may return to school once fully recovered and fit to attend.

We strongly believe that a little caution today can prevent the spread of infection tomorrow. Your cooperation will go a long way in keeping our school community healthy, safe and well.

Let us work together to protect our children and one another.

With regards

Richa Sharma
