<u>SUBJECT - Computers</u>

Follow the instructions below to create your webpage:

Create a new HTML file: Use a text editor (such as Notepad or TextEdit) to create a new HTML file. Name the file yourname_class_sec_holiday_homework.html.

Set up the basic structure: Begin your HTML file with the basic structure of an HTML document. Include the <!DOCTYPE html> declaration, <html>, <head>, and <body> tags.

Add a title: In the <head> section, add a <title> tag with a meaningful title for your webpage.

Add a heading: In the <body> section, add a heading to your webpage using an appropriate HTML tag (e.g., <h1> or <h2>).

Add a paragraph: Add a short paragraph that describes the purpose of the webpage.

Create an ordered list: Add an ordered list (<ol>) with your top 5 favourite foods.

Create an unordered list: Add an unordered list (<ul>) with your top 5 favourite activities.

Create a nested list: Inside one of your lists (either the ordered or unordered list), nest another list of related items. For example, if your favourite activity is reading, you might nest a list of your favourite genres.

Create a table: Add a table (<table>) that lists your 3 favourite subjects in school. The table should have three columns: the subject name, the teacher's name, and your grade in that subject.

Style the table: Add a border attribute to the <table> tag to give your table a border. You can also style the table further using other attributes such as cellpadding and cellspacing.

Review your code: Double-check your HTML code to make sure there are no syntax errors.

Save your work: Save your HTML file.

View your webpage: Open the HTML file in a web browser to see how your webpage looks.

Submit your assignment: Follow the teacher's instructions (to be given later) for submitting your assignment.
